Confirm this by squeezing each half of the heart. The left half will feel much firmer and more muscular than the right side. (The left side of the heart is stronger because it has to pump blood to the whole body. The right side only pumps blood to the lungs.) 2. On the Corner of Heartache and Love | InD'tale Magazine ... - When we look at the surface of the heart, we could sort of imagine it like a square with four corners. Why would we even try to define the four corners of the heart? Because each of those corners correspond to the best spot where you could put your stethoscope and hear each valve better than the other three. The four corners of the heart - Antranik.org -
